

## McCloskey International's newest products take the stage at AGG1/World of Asphalt

### *Maneuverability and versatility key attributes of new designs*

**PETERBOROUGH, ON –December 19, 2018** – AGG1/World of Asphalt visitors will get a first look at McCloskey International's new products that are compact and highly mobile. The newest addition to the stacker range, the All-Terrain ST80T with lift axle, will be front and center, showing off its ability to switch from tracked to wheel in minutes. The latest design for the compact crusher, the I34R, will also be featured at the show in Indianapolis, Indiana February 12-14, 2019 at Booth 37070.

#### **TRACK STACK AND ROLL**

The All Terrain ST80T blends all the benefits of onsite track mobility with the high productivity of a radial conveyor. The ST80T has a lift axle option which allows it to switch from track mode to radial in seconds.

Designed for use in any terrain, the All-Terrain stackers, ranging from 60' to 150', are easily moved site to site without the need to remove the wheels for transport. Built-in levelling indicators allow operators to position the stacker regardless of the ground evenness, with independent hydraulic jack legs to stabilize once in place. The McCloskey design also eliminates the need for any additional equipment, delivering a clean radius without material buildup.

The stackers feature a unique rear counterweight that counter balances the tracks and wheels, which are behind the stacker's centre of gravity. The design enables a much higher stockpile capacity, with the radial wheels set well back. The rear counterweight also firmly anchors the tail end during radial mode, delivering greater stability to the stacker while in operation.

### **SMALL FOOTPRINT – BIG RESULTS**

AGG1 is also the perfect opportunity for McCloskey International to showcase the I34R compact crusher line as a solution for aggregates producers needing small footprints and manoeuvrability, while having big production requirements. The I34R offers the versatility of a full recirculating system and is suited particularly to applications in aggregates, construction and demolition recycling and asphalt recycling.

### **COMPACT SAND PLANTS TOP OF MIND FOR MWS**

McCloskey Washing Systems (MWS) will be on-site at AGG1/World of Asphalt to present the latest additions to the CSP (Compact Sand Plant) line, which delivers superior separation efficiency, produces the driest, drip-free final washed sand product, and produces up to two in-spec sands, to desired grade, at up to 250 total tph.

### LIPPMANN-MILWAUKEE'S NEW PRODUCT RANGE AT AGG1

Located at Booth #36102 at AGG1, Lippmann-Milwaukee is a leading manufacturer of aggregate crushing equipment for processing applications, and a member of the McCloskey group of companies. Since its inception, Lippmann has become synonymous with highly productive and reliable heavy-duty jaw crushers that are built to last. The new

product range, tracked and wheeled mobile crushers, screeners and stackers, will be introduced at AGG1, creating a complete product line.

Over the past twelve months McCloskey International has continued to add new dealers across all regions to represent the number of new products that are added regularly to the company's portfolio. Many of these dealers will be attending AGG1/World of Asphalt 2019, and visitors will be able to connect with them during the show and after.

-30-

McCloskey International Limited designs and manufactures innovative crushers, screeners, stacking conveyors and washing systems. Since 1985, McCloskey International has been exceeding expectations with reliable, durable and high performing products. McCloskey equipment is used across industries including aggregate, mining, construction & demolition, waste management & recycling, landscaping and composting to help achieve profitable volumes for customers around the world. For more information on McCloskey visit [mccloskeyinternational.com](http://mccloskeyinternational.com).

McCloskey Washing Systems (MWS) designs and manufactures a full range of modular, mobile and static washing equipment for the aggregates, waste & recycling, mining and construction & demolition sectors. A division of McCloskey International, McCloskey Washing Systems shares a customer driven approach to product development that has led to the investment in a new centre of excellence, which will complement the existing facilities in the UK, Canada and the USA. For more information and for a full range of washing equipment offered by McCloskey Washing Systems, visit [mccloskeywashing.com](http://mccloskeywashing.com) or you can follow MWS on LinkedIn.
